Fix revolutionizes online dating by addressing the flaws of existing platforms through its semi-blind dating approach.

Wireframe:

Milestones:

October 30: Create full storyboard (wireframe) in XCode. Include functionality of buttons to direct to new views. Will not have backend support yet.

November 13: Begin backend development. Work on saving user data, passing in images, and creating accounts.

November 27: Work on support for multiple users, increase functionality for chats, show multiple users, get matches working, and support friends list.

December 11: Testing and debugging the app.
